

**AMIS BRIQUETTING PRESS**

# ABP 60 L

SCAN ME!

## IMMEDIATELY READY TO USE BRIQUETTING PRESS

The briquetting press is designed for pressing sawdust and all kinds of wood chips. The design of the briquetting press is compact and handy. The large oil tank ensures that the oil can not overheat

during continuous use of the press. The briquetting press is immediately ready for use and does not have to be installed yet - so plug in and play. The press is designed and manufactured in Germany.

## TECHNICAL DATA:

<b>Hydraulic power unit:</b>	(kW)	4 kW / 200 bar
<b>Consumption per hour:</b>	(approx. kWh)	ca. 2,5
<b>Voltage:</b>	(V)	400
<b>Frequency:</b>	(Hz)	50
<b>Fuse current:</b>	(A)	16
<b>Supply cable length:</b>	(m)	3
<b>Throughput:</b>	(approx. kg/h) *	20-40
<b>Weight:</b>	(approx. kg) **	300

\* Throughput is depending on the material and its residual moisture. Residual moisture should not be more than 14 %.

\*\* Depending on equipment

## OTHER FEATURES:

- User friendly
- Hydraulic control
- Briquette diameter 60 mm
- Briquette length varies by the material to be pressed
- Motor equipped with motor protection switch and emergency stop
- Big buffer tank
- No electronic components, such as controllers, PLCs and sensors
- Short lead time
- Quick supply of spare parts
- Pressing without addition of additives
- Voluminous chips can be processed
- No adjustment or monitoring of the pressure is required
